Michael Svendsen, Computerworld freelance journalist

09:00 - 09:05: Welcome by moderator Michael Svendsen

Michael Svendsen
Computerworld freelance journalist

09:05 - 09:30: How to unlock your business' potential using modern application delivery and development

Øivind Ekeberg
Solution Architect
Red Hat / Partner

Øivind Ekeberg, Solution Architect in Red Hat, will help us understand what application modernization really is. Why is it important, what are the challenges — and how to solve them with Red Hat OpenShift, including containers and microservices.

Learn how IBM and Red Hat provide end-to-end hybrid cloud solutions designed to enable clients to integrate private and public cloud while protecting their existing IT investments.

09:30 - 09:35: Q&A, Øivind Ekeberg - Red Hat

09:35 - 09:55: Open Source in today's enterprise

John Mertic
Director of Program Management
The Linux Foundation / Partner

We hear of open source being transforming organisations globally, but what does that mean and what impacts is this having? In this talk, John will explore this topic and showcase ways to help your organisation better leverage open source and measure its impact in your organisation.

09:55 - 10:00: Q&A

10:00 - 10:20: The cloud you want —with the privacy and security you need

Daniel Waage Kyte
Nordic Sales Specialist LinuxONE
IBM / Partner

Antti Maasalmi
LinuxONE Technical Specialist
IBM / Partner

Andy Hoiles
IBM Systems Specialist
IBM / Partner

Deliver security, privacy and resiliency at scale as part of your enterprise-wide cloud infrastructure. Consistently develop, deploy and orchestrate next-gen apps. Build new digital services that are developed once and deployed across your cloud. But how?

As a practical example of this learn how The Met Office migrated its meteorological databases from x86 systems to a resilient, high-performance, and scalable IBM LinuxONE platform—ensuring it can handle massive peaks in requests. Hear how this enables the Met Office to collect, process, store, and then reissue about 200 million unique observations every day from the UK and around the globe with 24x7 availability.

10:20 - 10:25: Q&A, Daniel Kyte, Antti Maasalmi & Andy Hoiles, IBM

10:25 - 10:40: Wrap up by moderator Michael Svendsen
