Velkommen til IAM Festival 2023

19. januar - ICY Security, Ballerup

09:00 - 09:05	**Hva' så, Ballerup – er I derude ...?** Lars Jacobsen, Chefredaktør og moderator, Computerworld
09:05 - 09:20	**Et kig i IAM-krystalkuglen** Tommy Petersen, partner, ICY Security
09:20 - 09:40	**Det handler om at være Tryg – også når det gælder IAM** Katja Schou Hansen, SDM og team lead IAM, Tryg Forsikring A/S
09:40 - 10:05	**En pragmatisk tilgang til NIS2 – her er din gode plan** Jesper B. Hansen, CTO, Siscon Per Samuelsen, Partner, ICY Security Flemming Caspersen, Head of Group Security, Topdanmark
10:05 - 10:30	**Pause**
10:30 - 10:50	**Kolding Kommune bygger fremtidens IGA-hus** Chris B. Nørregaard, IT- og digitaliseringschef, Kolding Kommune
10:50 - 11:25	**Paneldebat: Er identitetssikkerheden i skyen helt i skoven?** Janus Friis Bindslev, Chief Digital Risk Officer, Pension Danmark Allan Frank, IT-sikkerhedsspecialist & cand.jur., Datatilsynet Ole Kjeldsen, Teknologi- og sikkerhedsdirektør, Microsoft
11:25 - 11:45	**Sådan får du kontrol over IAM efter et virksomhedssplit** Kenny Damgaard Outzen, Director, Head of Digital Workplace & IAM, Nuuday
11:45 - 12:20	**"It wasn't me, it was Bennett Arron"** Bennett Arron, comedian and identity theft speaker
12:20 - 13:00	**Frokost**
13:00 - 14:35	**FULDT BOOKET - Understand how Privilege Account Management can protect your organisation, by first thinking like a Threat Actor (Scene - Workshop 1 - BeyondTrust)** Lee Elliott, Director Solutions Engineering, BeyondTrust
13:00 - 14:35	**FULDT BOOKET - Become the king of digital customer experience: How IAM (CIAM) can support modern digital customer experiences (Scene - Workshop 2 - Ping Identity)** Mehmet Yaliman, Senior Solutions Architect, Ping Identity
13:00 - 14:35	**FULDT BOOKET - Weaving Your Zero Trust Identity Fabric (Scene - Workshop 3 - Broadcom)** Grant Clements, Client Services Consultant - Security and Integration, Broadcom Andreas Eskerod, Security Advisor, Cisco
13:00 - 14:35	**FULDT BOOKET - How to Avoid Common IGA Pitfalls and Deploy Successfully (Scene - Workshop 4 - Omada Identity)** Niels Fenger, Advisory Practice Director, Customer Success, Nordics, Omada Identity

13:00 - 14:35	**FULDT BOOKET - Step up your digital transformation: How to deliver frictionless, secure digital experiences with the help of CIAM (Scene - Workshop 5 - Thales)** Henk Willems, CIAM Advisor, Thales Group
13:00 - 14:35	**Identity Security for Invisible and Emerging Threats (Scene - Workshop 6 - CyberArk)** Len Noe, CyberArk Technical Evangelist, White Hat Hacker, Bio Hacker, CyberArk Jan Poulsen, Solution Engineer Nordics, CyberArk
13:00 - 14:35	**FULDT BOOKET - The future of identity is already here! (Scene - Workshop 7 - SailPoint)** Mikael Wikström, Identity Advisor, SailPoint
14:35 - 15:00	**Kom godt videre: Bobler og tips til at sparke IAM godt i gang i din organisation.**
15:00 - 15:00	**Tak for i dag**

09:00 - 09:05: Hva' så, Ballerup – er I derude ...?

Lars Jacobsen
Chefredaktør og moderator
Computerworld

09:05 - 09:20: Et kig i IAM-krystalkuglen

Tommy Petersen
partner
ICY Security / Partner

09:20 - 09:40: Det handler om at være Tryg – også når det gælder IAM

Katja Schou Hansen
SDM og team lead IAM
Tryg Forsikring A/S / Partner

09:40 - 10:05: En pragmatisk tilgang til NIS2 – her er din gode plan

Jesper B. Hansen
CTO
Siscon / Partner

Per Samuelsen
Partner
ICY Security / Partner

Flemming Caspersen
Head of Group Security
Topdanmark / Partner

10:05 - 10:30: Pause

10:30 - 10:50: Kolding Kommune bygger fremtidens IGA-hus

Chris B. Nørregaard
IT- og digitaliseringschef
Kolding Kommune / Partner

10:50 - 11:25: Paneldebat: Er identitetssikkerheden i skyen helt i skoven?

Janus Friis Bindslev
Chief Digital Risk Officer
Pension Danmark / Keynote

Allan Frank
IT-sikkerhedsspecialist & cand.jur.
Datatilsynet / Keynote

Ole Kjeldsen
Teknologi- og sikkerhedsdirektør
Microsoft / Keynote

11:25 - 11:45: Sådan får du kontrol over IAM efter et virksomhedssplit

Kenny Damgaard Outzen
Director, Head of Digital Workplace & IAM
Nuuday / Keynote

11:45 - 12:20: "It wasn't me, it was Bennett Arron"

Bennett Arron
comedian and identity theft speaker / Partner

12:20 - 13:00: Frokost

13:00 - 14:35 - FULDT BOOKET - Understand how Privilege Account Management can protect your organisation, by first thinking like a Threat Actor (Scene - Workshop 1 - BeyondTrust)

Lee Elliott
Director Solutions Engineering
BeyondTrust / Partner

Before you can effectively protect your environment against Threat Actors you need to understand not only their tactics, techniques and procedures but also their thought process.

Join BeyondTrust in an interactive session to form of a small team of elite Threat Actors at a LIVE guided gaming session. The goal is to damage National Critical Infrastructure by hacking a network and technologically disrupting, denying, or DESTROYING a fictional nuclear power plant.

In this collaborative journey your team will think like Threat Actors and work through all three phases of an attack – RECON, ACCESS & ATTACK - to create a potentially successful Advanced Persistent Threat (APT) against the target!

We can then also discuss where, and also where not, Privilege Account Management solutions could have stopped or mitigated that APT.

13:00 - 14:35 - FULDT BOOKET - Become the king of digital customer experience: How IAM (CIAM) can support modern digital customer experiences (Scene - Workshop 2 - Ping Identity)

Mehmet Yaliman
Senior Solutions Architect
Ping Identity / Partner

Identity is the core of many digital experiences. From detecting fraud to improving registration experiences, companies that invest in identity are able to win more customers and increase revenues. But for years identity has been limited to a group of experts - until now.

Join this workshop, hosted by Ping Identity, to discuss the potential of identity orchestration. With orchestration, you can open identity up to developers, business stakeholders, and more. We'll discuss numerous ways and examples of how orchestration helps enterprises deliver exceptional, secure user experiences with speed and agility.

13:00 - 14:35 - FULDT BOOKET - Weaving Your Zero Trust Identity Fabric (Scene - Workshop 3 - Broadcom)

Grant Clements
Client Services Consultant - Security and Integration
Broadcom / Partner

Andreas Eskerod
Security Advisor
Cisco / Partner

Join this workshop to discuss how you could achieve a mature security model aligned to Zero Trust principles with Identity at the core.

The workshop will be a mix of expert talk, topics for discussion and relevant use cases. The workshop will be led by Andreas Eskerod, Risk Management & Information Security Advisor at Arrow. Expert talk provided by Grant Clements, Broadcom.

13:00 - 14:35 - FULDT BOOKET - How to Avoid Common IGA Pitfalls and Deploy Successfully (Scene - Workshop 4 - Omada Identity)

Niels Fenger
Advisory Practice Director, Customer Success, Nordics
Omada Identity / Partner

Implementing IGA is not always a straight-forward task and often we have to find viable workarounds to a variety of project issues that encompass commercial viability, gaining business buy-in, IGA design, implementation constraints and operational dependencies. And no two IGA projects are the same. Omada has more than 20 years of success helping clients overcome IGA challenges and deliver on their identity governance goals.

Join our IGA experts to hear how our customers have avoided IGA pitfalls and successfully deployed a modern, scalable, and agile IGA solution.

We will also share the lessons learned from hundreds of customer projects with our authoritative guides on running successful IGA projects (IdentityPROJECT+) and building a world-class IGA solution (IdentityPROCESS+).

13:00 - 14:35 - FULDT BOOKET - Step up your digital transformation: How to deliver frictionless, secure digital experiences with the help of CIAM (Scene - Workshop 5 - Thales)

Henk Willems
CIAM Advisor
Thales Group / Partner

When managing their daily lives online, customers expect secure, fast, and seamless digital experiences. CIAM helps organisations do exactly that by designing and implementing frictionless digital customer experiences that don't compromise security.

At this workshop, we will look at how companies can implement the right CIAM solution to offer seamless, secure access to people outside of their organisation, whether they are direct consumers (B2C), collaborators within a business-to-business ecosystem (B2B) or non-permanent stuff. We will also go over some of the major trends that are shaping the future of CIAM:
*· **Self-Sovereign Identity**: how can users be in control of the personal details they share with service providers, creating a frictionless, privacy-first user experience?*
*· **Externalised Authorisation**: how can fine-grained, policy-based access control allow permissions to be managed and streamlined across multiple applications or shared resources via a single, centralised platform?*
*· **Data Protection & Compliance**: how can a comprehensive CIAM solution respect consent, enable effective compliance and provide a consistent experience even in the most complex regulatory systems such as Schrems 2?*

Host: Henk Willems, CIAM Advisor, Thales Group.

13:00 - 14:35 - Identity Security for Invisible and Emerging Threats (Scene - Workshop 6 - CyberArk)

Len Noe
CyberArk Technical Evangelist, White Hat Hacker, Bio Hacker
CyberArk / Partner

Jan Poulsen
Solution Engineer Nordics
CyberArk / Partner

Biohackers exist and walk among us. Most security professionals would not allow users into their environment with offensive security tools. How do you address individuals who have surgically implanted such devices into their bodies. As security professionals, we must anticipate the unknown. These include any individuals that enter our facilities or are simply around us in public. These types of attacks are becoming more common. A majority of the security community are not aware they exist. Discussions on what was once thought to be science-fiction are now science fact.

Join us for a discussion on Today's Evolving IT and Threat Landscape and how CyberArk is taking on these challenges to help organizations stay secure.

Host: CyberArk

13:00 - 14:35 - FULDT BOOKET - The future of identity is already here! (Scene - Workshop 7 - SailPoint)

Mikael Wikström
Identity Advisor
SailPoint / Partner

Are you getting enough value from your identity program? Have you given up on maintaining an efficient role program? How do you empower your reviewers and approvers to make accurate and efficient decisions around access? These are some of the topics we will be discussing in this round table discussion where we will also learn the facts around how AI and machine learning is helping companies as well as peer sharing. Your host is Mikael Wikström who represents SailPoint, the leading innovator in using AI and machine learning to empower modern enterprises in building efficient and secure identity practices.

Host: SailPoint

14:35 - 15:00: Kom godt videre: Bobler og tips til at sparke IAM godt i gang i din organisation.

15:00 - 15:00: Tak for i dag
