08:30 - 08:55: Registration and breakfast

09:00 - 09:00: Opening and welcome

Deloitte & CAC ACADEMY

09:05 - 09:30: Leveraging the trust between banks and their clients

Olivier Kuhn
Online Banking Services Business Division Director
Worldline / Partner

Online Banking ePayment (OBeP) supported by strong authentication solutions is one of the most efficient combinations to bring trust in the relationship between all stakeholders of the payment value chain (consumers, merchants, banks, PSPs, schemes). Worldline will explain why and your benefits of implementing such solutions.

09:35 - 10:00: Loyalty Clubs in Denmark - key findings from Copenhagen Business School study

Per Østergaard Jacobsen
Direktør og ekstern lektor
Efficiens.nu og CBS / Keynote

Per Østergaard Jacobsen is lecturing in Performance Management & Marketing and Marketing Accounting at Copenhagen Business School, Department of Operations Management , CBS.

He and his team have completed a major survey on Loyalty Clubs in Denmark - more than 250,000 Loyalty Customers have contributed to this excellent study, and Per Østergaard Jacobsen will introduce you to some of the key findings.

The survey is to be launched officially on 2nd November 2015.

10:05 - 10:25: Data driven Business Development

Rasmus Winther Mølbjerg
Director
Deloitte / Partner

Despite an explosion of information, most companies only use a fraction of all the data that is available to them. Managing and exploiting digital data will provide the next frontier in business innovation, competition and productivity. Business models driven by the digital development which will change the products and services significant.

10:30 - 10:45: Break

10:50 - 11:10: Dankort - your new Loyalty Card

Henriette Dunkjær Andersen
Product Manager - Domestic card schemes
Nets / Partner

Nets A/S just recently launched a new service for Retailers to use the Dankort as their Loyalty Card - with the opportunity of getting access to special offers and discounts. Get the insights on how this new service is introduced and implemented - based on a case study.

11:15 - 11:35: A look at the payment horizon: Mobile and Cloud-based payments

Paul Koutinas
Principal Advisor
UL Transaction Security / Partner

Recent launches of new mobile payment technologies, such as Apple Pay, Samsung Pay and Android Pay have opened up a lot of possibilities for all actors involved in the payment ecosystem. This presentation will explore the recent developments and how a future-proof strategy can be ensured.

The short presentation will be structured as follows:

- Apple Pay / Samsung Pay / Android Pay
- Scandinavia and Mobile payments
- Lessons learnt from Valyou
- Competitive offerings today and in the future

11:40 - 12:10: Tokenization - The new Foundation for Payments, Mobile Commerce and Authentication: What it is, what it will be, and why it matters

Ove Skeie
Product Management, Merchants
PayEx / Partner

- *What is the new EMV tokenizations impact to the ecosystem?*
- *What role can the Financial institutions, Carriers, and emerging commerce platforms play?*
- *How can tokenization be applied to Mobile Commerce beyond payments ? Authentication, Access Control, and ID?*
- *What new tokenization approaches are evolving, from whom, and why?*
- *Key trends and developments*

12:15 - 13:10: Lunch

13:15 - 13:35: Future development of e-commerce, and Merchant requirements for payment solutions

Henriette Høyer
Sales Manager
DIBS Payment Services / Partner

Introduced by Nordic leading PSP DIBS

13:40 - 14:00: Mobile payments and Data - Infrastructure or just payments?

Mathias Skaarup Lyster
Business Innovator.DK / Partner

A key difference in the payment market is how the mobile payment applications are build and marketed; in one end we have Apple Pay / Android Pay who are simple payment application that mostly deal with payments via NFC technology and do not much else.

On the other end, there are applications such as WeChat, who is building complete eco-systems around their payment platform, allowing for APIs to be installed in the WeChat application, such as P2P money transfer, taxi ordering and much more. Based on platform envelopment theory, platforms have to bundle up with other services to stand stronger in the markets.

14:05 - 14:40: Do we get a rainbow after rain? EU regulatory storm and the payment industry

Krzysztof Korus
expert in regulations and business models
Prudentiz, Poland / Partner

For many years Krzysztof has been advising leading financial and trade institutions, industry bodies and policymakers in securing sound and prudent operation of providers and markets in the EU and elsewhere. He constantly searches for a way to make compliance challenges much more self-explanatory than they are now.

14:45 - 15:00: Break

15:05 - 15:25: Nordic Payment Market 2020

Ola Engebretsen
Partner
A.T. Kearney / Partner

A.T. Kearney just recently conducted a major study on payments cards and usage in the Nordic countries. Based on some of the key findings in this study - combined with other market insights we will have a discussion of the Nordic Payment Market 2020, and major trends over the coming 4 to 5 years.

15:30 - 15:55: CATSJ - The breakthrough marketplace that combines advertisers and mobile users

Jakob Kargaard
Country Manager
CATSJ Danmark ApS / Partner

CATSj users earn points continuously, receives good offers and deals, unique advantages, entertainment, fine content and excellent competitions - and the contra-deal is to be exposed to advertising as an integrated part of the mobile univers. Learn more about this new application and service in Denmark - just to be launched!

16:00 - 16:00: Conference summary and close
